Our Website www.SensusFit.com (the “**Website**”) uses cookies. By using the Website and the SensusFit App (the “**App**”), you consent to the use of cookies. A cookie is a small text file that is stored in your web browser that allows us to recognize you. Cookies might be used for the following purposes: (1) to enable certain functions; (2) to provide analytics; (3) to store your preferences; and (4) to enable ad delivery and behavioral advertising. Use of cookies by the Website: When you use our Website we may place a number of cookies in your browser. Some of the cookies will only be used if you use certain features or select certain preferences, and some cookies will always be used. Cookie categories: Each cookie serves one of four different purposes:

- **Preferences:** We use these cookies to remember your settings and preferences. For example, we may use these cookies to remember your language preferences.
- **Security:** We use these cookies to help identify and prevent security risks. For example, we may use these cookies to store your web-session information to prevent others from changing your password without your username and password.
- **Performance:** We use these cookies to collect information about how you interact with our services and to help us improve them. For example, we may use these cookies to determine if you have interacted with a certain page.
- **Analytics:** We use these cookies to help us improve our services. For example, we can use these cookies to learn more about which features are the most popular with our users and which ones might need some tweaks.
- **Advertising:** We use these cookies to deliver advertisements, to make them more relevant and meaningful to users, and to track the efficiency of our advertising campaigns, both on our services and on other websites or mobile apps.

We may also use other similar technologies on our services, such as pixel tags and local storage. We use these technologies to do things like help us see what features are most popular, create a more personalized experience, and deliver relevant ads. Pixel tags (also called clear GIFs, web beacons, or pixels) are small blocks of code installed in or on a webpage, mobile app, or advertisement. These tags can retrieve certain information about your browser and device such as: operating system, browser type, device type and version, referring website, website visited, IP address, and other similar information. Local storage is an industry-standard technology that allows a website or mobile app to store and retrieve data on an individual's computer, mobile phone, or other device. You should be aware that any preferences will be lost if you delete cookies and many websites will not work properly or you will lose some functionality. We do not recommend turning cookies off when using our Website for these reasons. Most browsers accept cookies automatically, but you can alter the settings of your browser to erase cookies or prevent automatic acceptance if you prefer. Generally you have the option to see what cookies you've got and delete them individually, block third party cookies or cookies from particular sites, accept all cookies, to be notified when a cookie is issued or reject all cookies. Visit the 'options' or 'preferences' menu on your browser to change settings, and check the following links for more browser-specific information. To learn more about how to do this, visit the help pages of your browser.
